

PROPOSAL 1: Hybrid Conference Protocol

The NWTRCC Coordinator and Outreach Coordinator will seek to prioritize the online portion of all future conferences with equal importance along with the in-person attendees. This means that Wi-Fi connectivity will need to be a crucial part of the physical site chosen for the in-person location. NWTRCC will purchase required portable PA system if we do not already have it, or can be supplied by the conference host, which can allow for direct communication from online attendees to conference attendees. The importance of the virtual component of the NWTRCC conferences is paramount so that we can hopefully grow our attendee numbers to which the virtual aspect has much greater potential.

From Joshua Wrolstad

PROPSAL 2: Restricting Discussions

Neither the NWTRCC Coordinator or Outreach Coordinator or any other member may without a vote from the entire conference assembly, restrict, constrain, or censor discussion proposed by attendees in good faith (pertaining to war in all its forms) whether online or in person. Good faith will be determined by a democratic vote so that all members can feel free to discuss matters relevant to the overall purpose of WTR. There are multiple processes for the listing and ordering of comments, discussion topics, disagreements, or other, which are transparent and encourage instead of inhibiting discussion and debate.
