While the acidic rains

The drizzle of poison adds to a steadily mounting burden.

-the potential for long-term economic costs is high.

Mr. Reagan sidestepped doing anything about the acid rain in the past five years to study it further. He promised to study it, and then he promised to study it some more. Finally, in 1985, the President promised to study it to death. By now, the administration has determined that the most drastic action that could be taken in the three million tons of sulfur emissions must be roughly 12. Out of that meal has come the central sacrament in Christian worship, the Eucharist.

The story of Holy Week and Easter

Colman McCarthy

Sitting out April 15 for reasons of conscience on the tax day is a move that makes a central statement about the system of America's tax laws. It is not, as some say, a protest against just the Vietnam war. The National War Tax Resistance Council, headquartered in Los Angeles and including a 400 percent increase — from 45 to 180,000 — is a protest against all war.
