CASTRO DEMANDS U.S. HALT BOMBINGS

BUENOS AIRES—President Fidel Castro demanded an end to the U.S. bombing of his country on Thursday in a broadcast to the hemisphere calling for a halt to the "barbaric acts".

"The United States authorities arrived late in the night and requested an interview," he said. "We granted them a meeting and it was here that we told them that we were reserving all our rights to answer any request and that we were going to give no answer in the face of this attack.

"We told them that only those who initiate these acts are to blame. We did not answer any request from the United States authorities because we have the right to reserve all our rights.

"We are going to continue this current problem until we obtain the solution that we desire.

"We are reserving all our rights in this matter and we are going to give no answer to the United States authorities, who are making this attack."

Hear Castro's complete words in the broadcast. The Associated Press will have a transcript of the broadcast later in the day.
